

Vision

Our vision is a world where everyone experiences music as a natural self-expression.

Foundation Statement

Simply Music is an organization responsible for creating, developing and presenting ground-breaking music programs. Our focus is to cause a new era in music learning, and provide an unprecedented opportunity and ease for people to learn how to play and teach music. To that end:

- We are creating an organization committed to the highest levels of integrity, graciousness and service.
- We are creating a work place that reflects a commitment to excellence, impeccability and efficiency.
- We are creating a work experience for our team that contributes to their quality of life, that provides opportunities to develop their existing strengths, and supports them in moving beyond those challenges that thwart their ability to grow as individuals.
- We support free-enterprise; we provide opportunities for the young and support for the elderly; we foster cross-cultural and inter-cultural harmony, and we are creatively pro-active in generating stronger, healthier communities.
- We are dedicated to acknowledging the global community of people whose abilities, resources and life-investment make a direct contribution towards bringing our vision into reality.
